MEDICAL WEIGHT LOSS

Lose Weight Now and keep it off!

As our body weight increases so
does the incidence of comorbid
conditions like Diabetes,
hypertension, High cholesterol, Sleep
Apnea etc. We fully realize this fact
and focus on the root cause;
"OBESITY".

At the Center for Primary Care and
Prevention, we realize and
emphasize the importance of
maintaining a healthy weight with
diet and exercise. However when
these measures fail, we offer weight
loss using FDA approved
medications and treatments as well
as natural vitamins under medical
guidance. Together we can not only
help you lose weight now, but
maintain it.

Internal Medicine

At the Center for Primary Care & Prevention, we treat a variety of medical conditions including some of the common disorders like,

Diabetes
Hypertension (high blood pressure)
High cholesterol
Lung diseases like COPD & Asthma
Skin disorders
Arthritis & Rheumatologic disorders

We have many tools to assist the physician in evaluation for common illnesses. These include **EKG, Pulmonary Function tests, Holter monitor, 24 hour Ambulatory Blood Pressure monitoring (ABPM)**

Amongst others. We will also provide laboratory services including basic testing as well as advanced studies through **Health Diagnostic Laboratory Inc.**

We have plans to introduce other advanced testing and services in the coming months to enhance focus on prevention. These tests will include:

Allergy testing and treatments
Bone Density
SHAPE-HF test
Critical Care Assessment
EndoPAT test
Carotid Intimal Medical Thickness
